RESEARCH PROJECT (BHM309)
HOURS ALLOTTED 15

The objective of research is to seek answers to problems through application of scientific methodology which guarantees that information collected is reliable and unbiased. This information is utilised to make conclusions and recommend solutions. The elements that are to be kept in mind while undertaking research is deciding a relevant topic, feasibility, coverage, accuracy and research, objectivity and ethics.

In the SEM V, students will work closely with their supervisor and develop mutually working relationship to initiate the research which would involve preparing an outline and preliminary collection of data. The supervisor will guide the student in framing and planning the research project and the methodology to be adopted in collection of data, through interviews, telephones, mailers etc. while the student on their part will expose themselves to research of the topic through meetings, interviews, internet search, library etc. The student should generally produce all material in word processed or typed format so that the presentation is neat and legible. Student must inform their supervisor or other people with whom their work is being discussed. The research should be planned to minimise time wastage and a clear time scale should be put in place. The research should really spell out the objective, its findings, the methodology adopted, its conclusions and recommendations. The student and supervisor will work together to prepare synopsis of the research.

One hour per week has been allocated for the purpose and students alongwith the supervisor must regularly interact during this period. The final preparation and presentation would be done during SEM VI before a panel of internal and external examiners through a report and viva voce.

**COVERAGE OF SPECIAL TOPICS
USING EXTERNAL GUEST AND EXPERT SPEAKERS
HOURS ALLOTTED: 30**

As per teaching scheme, two hours per week have been allocated for External Guests as Expert Speakers to create a good academic interface with the industry. This is an important activity to complement our existing faculty through inviting renowned industry experts to address specialised disciplines and investigate emerging business trends, techniques and innovative case-studies.

GUIDELINES FOR USING EXTERNAL EXPERT SPEAKERS

1. Before inviting the Speaker, make sure that they *really are* experts in the relevant subject.
2. Invite, if possible, Speakers who are not only experts in subjects but are also capable speakers.
3. If, although they are eminently suitable because of their expertise, they have poor presentation skills, offer them support.
4. Inform them in writing, and in clear unambiguous terms, of the aims and objectives of the session.
5. Discuss with them, then confirm in writing, specifically what you want them to cover: exactly how long they have to speak: and what questioning techniques will be employed – during and after the session.
6. Give them full information, in writing, about the starting time, the location, and the size and level of the participants.
7. Confirm whether they will use aids and, if so, of what type(s) and how many. Do they already have them, are they of acceptable quality: do they want any help in procuring them: do they want to use aids available with you.
8. Confirm whether they intend to use hand-outs: do they have them available: do they want any support in their production: when do they intend to use them.
9. Seek and confirm their views on the room layout – what type they would prefer or whether they have to accept the existing room layout.
10. Arrange a feed-back session with the participants – as you may want to use them again.

Maintain a record of the date, duration of the session and contact details of the Guest Speakers for future references which may be required by your institute and the NCHMCT.
